SAIDAKBAR ABDURASHIDOV

Full-Stack Developer · AI-Agent Workflows · IT Systems

Tashkent, Uzbekistan (open to remote) | +998 87 034 30 03 | sr6535sr@gmail.com | 2tsex.vercel.app

Summary

Full-stack developer (JavaScript, Python) who ships working tools fast using CLI-based AI coding agents. Built and deployed a live production-monitoring dashboard with barcode/QR data entry for a manufacturing company. Backed by 3+ years of hardware diagnostics and multi-platform OS administration, so I debug the whole stack, from device to browser. Computer Science student, available for remote freelance and contract work.

Skills

Development: JavaScript, Python, full-stack web apps, dashboards, REST/data entry tools, object-oriented programming

AI-assisted engineering: CLI-based AI agents, prompt engineering, agent workflows and automation

Systems: Windows/macOS/Linux administration, hardware diagnostics and troubleshooting, embedded systems, PLC / ASCII-based systems

Other: Unity (2D game development)

Experience

Software Engineer / Full-Stack Web Developer **12/2025 – 06/2026**

Fazo Luxe – Tashkent, Uzbekistan

- Designed and deployed a full-stack production-monitoring dashboard with real-time efficiency tracking and report generation: **2tsex.vercel.app**.
- Added barcode/QR scanning to speed up shift-based data entry for manufacturing equipment.
- Used CLI-based AI agents to shorten development cycles, including custom code for PLC and ASCII-based systems.
- Applied 3+ years of hardware diagnostics and OS administration experience to improve system reliability.

Projects

- **Production Monitoring Dashboard** – live, in daily use on the factory floor (link above).
- **Adaptive Testing Platform** – web app inspired by MyTest that reorders questions based on the user's accuracy.
- **2D Unity Game** – built with AI agents; graded 98/100, the highest in the class.

Education

B.Sc. Computer Science and Information Technologies **Expected 01/2029**

International Digital University – Tashkent, Uzbekistan
